Antam’s total exploration cost in June 2012 totalled to Rp13.3 billion (unaudited preliminary figure).

Antam conducted nickel exploration activities in Buli, North Maluku; Lalindu dan Mandiodo, South-east Sulawesi; and Pulau Gag, West Papua in July 2012.

Gold exploration activities were conducted at Pongkor and Papandayan, West Java; Cibaliung, Banten; Batangsai, Jambi; Mao, Batuisi, West Sulawesi; and Oksibil, Papua in July 2012.

Antam conducted bauxite exploration activities at Mempawah, Landak, Tayan, and Munggu Pasir of West Kalimantan in July 2012.

In July 2012, Antam carried out coal exploration in Bangko Jami, limestone exploration in Sangaji, North Maluku as well as zircon exploration in Mandor, West Kalimantan.

Jakarta, August 10, 2012

PT ANTAM (Persero) Tbk (ASX – ATM; IDX – ANTM; Antam) is pleased to announce its exploration report for July 2012 in accordance with the Indonesia Stock Exchange listing rules.

Antam’s exploration activities were focused on nickel, gold, bauxite, coal, limestone and zircon in July 2012, with total preliminary cost of Rp13.3 billion.

NICKEL

Nickel exploration activities were conducted in Buli, North Maluku; Lalindu and Mandiodo, Southeast Sulawesi; and Pulau Gag, West Papua in July 2012.

In general, Antam conducted core logging and sampling, moisture content and specific gravity measurements, test pitting, topography and grid measurement, drilling, x-ray diffraction measurement, detailed geological mapping (DGM), sample preparation, and cross checking with external laboratory.

GOLD

Antam conducted gold exploration activities at West Java, Banten, Jambi, West Sulawesi, and Papua in July 2012.

Exploration activities at Pongkor included, among others, DGM, core logging, hand-auger survey, core and soil sampling, drilling, drill-track measurement, and geophysical survey with gravity method, point load testing, as well as geological evaluation and modeling.

In Papandayan, West Java, Antam performed DGM, core logging, test pitting, core sampling and drilling, geotechnical drilling, drill track measurement, and geophysical survey using magnetic, gravity, and CSMAT methods.

At Cibaliung, Antam conducted DGM, semi-detailed geological mapping (SDGM), hand-auger survey, drilling, core logging, rock, core, XRD, soil, and petmin samplings, geophysical survey with induced polarization (IP) method, and measurement of drill track and holes.

Meanwhile, at Batang Asai, Jambi, Antam performed DGM, trenching, hand-auger survey, fluid inclusion (Fl) and XRD samplings, drill
logging, drill tracks and holes and trench measurement, geophysical survey with magnetic and IP methods.

At Oksibil, Papua, Antam conducted SDGM, DGM, trenching, rock and XRD samplings, structure mapping, drill logging, drill track measurement, GPS survey, and geochemical analysis of soil and rock.

**BAUXITE**

Antam conducted bauxite exploration activities at Mempawah, Landak, Tayan, and Munggu Pasir, West Kalimantan. Total exploration activities for bauxite in July 2012.

Antam performed grid measurement, test pitting, and sampling as part of its bauxite exploration activities.

**COAL, LIMESTONE & ZIRCON**

During July 2012, Antam performed field surveys at coal, limestone, and zircon prospects. The initial surveys for coal exploration were conducted in Bangko, Jambi and field surveys for limestone were performed in Sangaji, North Maluku. In addition, exploration activities with zircon target were carried out in Mandor, West Kalimantan.

###

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr. Lukman Effendi, who is a Member of The Australasian Institute of Mining and Metallurgy. Mr. Lukman Effendi is a full-time employee of the company. Mr. Lukman Effendi has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Mr. Lukman Effendi consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
